**Subject:** Microsoft settlement

Unless the fix is in and settlement is just intended to be a sham (which is what a lot of Americans suspect is happening), close *\*all\** the loopholes. Ignore Microsoft's whining. Hit the bastards hard. God knows they deserve it.

The computer industry has been stagnating because of lack of competition. Do something drastic enough that investors will dare to support companies going head to head with Microsoft. Anything less will be no remedy at all.
